

# Driver Development Course

As an Authorised Partner of RoSPA, Pregem is able to offer its customers a wide range of driver and fleet training services delivered by RoSPA but at discounted rates.

## Course objectives

This course has been designed to raise awareness of driver behaviour and to encourage safe decision making.

As well as promoting an understanding of defensive driving principles, the course also seeks to encourage drivers to be honest about their own driving behaviour. This provides an opportunity for the individual driver to develop coping strategies for both themselves and the behaviour of others.

On completion of this course delegates should have an awareness of:

- The occupational road risk faced by their organisation
- How personality, environment, and journey purpose affect driving behaviour
- The principles of defensive driving, and how to develop new skills and enhance existing ones
- Personal coping strategies related to driver behaviour
- How behaviour is the root cause of most crashes
- How we all behave inappropriately sometimes

## Who should attend?

This course forms part of a life-long programme of driver development and is tailored to meet the needs of the individual delegate, so is suitable for all drivers regardless of experience.

### Duration

Full day or half day course.

### Location

Training can be undertaken at your premises or at a mutually agreed location.

### Additional information

This course can run on either a 2:1 or 1:1 delegate to trainer ratio.

On a 2:1 ratio the course will be a full day. On 1:1 the course will be half a day. It is also possible to do two 1:1 sessions in one day.

To capitalise on the value of passive learning, we recommend having two delegates on the course for a full day.

The course is available in a range of vehicle types.

Refresher options are available for anyone who has completed the course in the last three years. This follows the same format, minus the theory session.

All delegates should be familiar with the latest edition of the Highway Code.

## Tailor the course to your drivers

One of the key benefits of this course is that managers are able to tailor the course to meet their specific business needs, and the needs of individual drivers.

Upon booking, managers will have the option to tailor the course so that it focuses on one of the following road risk priorities:

- Stress
- Rear end collisions
- Slow speed maneuvering
- Fatigue
- Speed

If managers decide to tailor the course in this way, our trainers will emphasise this topic during the course, whilst still giving an overview of the other areas.

## Additional benefits

- Reduce the frequency and cost of accident repair costs
- Lower down-time due to maintenance, repairs, and injuries
- Conduct more reliable vehicle scheduling
- Save on fuel, tyres and spares
- Enhance your company's image

## Accreditations

This course is available as a Driver CPC option and counts for 7 hours.

You must inform us at the time of booking if you would like this to be a CPC option. We will also need driving licence details for all delegates in advance of the course.
