

# Driver Profiler

## General information

As an Authorised Partner of RoSPA, Pregem is able to offer its customers a wide range of driver and fleet training services delivered by RoSPA but at discounted rates.

RoSPA's Driver Profiler is an online risk assessment tool designed to measure the attitude and behaviour of drivers.

It consists of questions about the driver's history and the type of driving they do, it also aims to risk assess the driver's attitude towards driving by measuring certain characteristics, including: aggression; alertness; stress; dislike of driving; anticipation; attention; violation; and error.

At the end of the assessment drivers are rated as high, medium, or low risk. A report is then sent to each driver detailing areas for improvement, and tips on how to do this.

Managers have secure access to all driver information and can easily see which drivers should be prioritised for further training.

## Who is this suitable for?

The Driver Profiler is suitable for anyone who drives for work purposes.

## Benefits to client

- Cost and time-efficient compared with in-vehicle assessments
- Helps managers prioritise training for individuals who need it most
- Has an in-built lie detector to highlight individuals who answer inconsistently
- A good first step to managing occupational road risk
- Fits with HSE guidelines on risk assessing all drivers
