

Online Driver Safety Package

Description

As an Authorised Partner of RoSPA, Pregem is able to offer its customers a wide range of driver and fleet training services delivered by RoSPA but at discounted rates.

RoSPA's Online Driver Safety Package combines the popular Driver Profiler and E-learning services. Fulfil your legal duty of care to risk assess your fleet of drivers with Driver Profiler and follow up with essential training to ensure all your drivers are equipped with key introductory knowledge and driving skills theory.

Objectives

Driver Profiler is an online psychometric risk assessment tool that measures attitude towards driving. It allows managers to compare individuals and make decisions on the provision of appropriate training.

On completion of the assessment a report is sent to each individual highlighting problem areas and giving tips and advice so drivers can see where and how to improve. They also receive a login to the E-Learning system allowing a seamless and automatic link to the training.

Drivers will have immediate access to the E-Learning training package which is designed to help drivers develop the attitude and behaviours necessary to manage today's driving situations in the safest way.

Benefits to client

- A more comprehensive approach to driver safety
- Identifies high risk drivers
- Identifies priority in-vehicle driver training candidates
- All drivers receive training regardless of risk rating

Call: 01420 544514

Email: sales@pregem.com

Duration

The Drive Profiler takes 15-20 minutes to complete and the E-learning typically takes around 90 minutes. Delegates can log in and out at any time.

Additional information

A standard broadband connection is required for the E-Learning course to run correctly.

All drivers will receive both products, regardless of their risk rating. We recommend that high risk drivers take part in a Driver Development session, however e-learning provides an excellent interim training measure whilst on the road training is arranged.

Managers are issued with a secure log-in which allows them access to all driver records and a risk rating for each.

Managed service options are available for clients who want the administration of the system to be managed for them, please contact us to discuss your requirements, and we will be able to provide you with a bespoke cost.
